

NON-CARBONATED READY TO DRINK/COOLERS

We had so much diversity in our ready to drink and cooler entries that we were able to split out some of the non-carbonated entries into their own categories. Some people don't enjoy the gassiness or fizzy character of carbonated drinks, and others just prefer to have a still, non-sparkling bevvy to beat the heat. *Tom Firth*

VODKA SODA READY TO DRINK

As the ready to drink category has taken off, we've seen many that encapsulate the need for "Ready to Drink" - refreshing beverages that are ready to go, whether to the beach, the cabin, post-adventure, or even just by the water's edge, soaking your feet. We had so many great takes on the classic vodka soda (many without sweeteners or low-cal!), we decided to show them off in the same place. *Tom Firth*
