

SODAS AND MIXERS

One of the best parts of being an adult is that you can have a bottle of coke and put some rye, rum, vodka, or any distilled product you'd like into it. As there are so many types of spirits it is always great to have a good companion to help these strong liquids to be more enjoyable, you can change the flavour and finish with a lemon, or a hint of elderflower. It is always fun to play with flavour in cocktails, but when you don't feel like being too adventurous these folks did it for you. *Dave Gingrich*

(4-pack bottles)

**Annex Ales
Saskatoon
Lemonade**
Alberta, Canada
\$13-14
(4-pack cans)

TONIC WATER

Until 2005, the tonic water market was dominated by only a couple of players, but today it's close to a billion dollar market. As taste changes and consumer spending rises, people look for more variety and premium products. Fever-Tree is a favourite but try Barker and Quinn's Light at Heart next time you want to try something new.

PS: look up the new trend of espresso tonics... *Will Trow*
