

# READY TO DRINK BEVERAGES CARBONATED

Way back, when I was a younger lad, the options for a libation that wasn't wine, beer, or spirits was pretty limited. There were things like B & J wine coolers, a smattering of things like Boone's or a wide range of terrible, trendy drinks (anyone else remember Rockaberry?) and until the hard lemonades took over, it was a wild and woolly west. These days, the bandwagon is pretty full with so many breweries, distilleries, and almost everyone else giving them a try – and the options have never beer better. *Tom Firth*
