

ROSÉ

Rosé, is by far the most talked about wine category at the moment - because it's just that good. These wines see anywhere from four hours of skin contact to give that pretty pink or orange tinge, to some that are on the skins for perhaps a couple days with a deeper red and magenta colour. With so many great examples we chose the winners with the best structural balance and flavour intensity. This was a category that the judges deliberated with a fine-tooth comb, as there were so many fantastic examples submitted from dry to off dry in style. *Cam Pinkney*

JUDGES SELECTION

When someone says “cream liqueur”, most of us instantly think of Irish Cream, but there is so much more to the category these days! With offerings from right here in Canada, to South Africa, the Netherlands, and Guyana, it's fair to say that “Irish” is no longer synonymous with “Cream Liqueur”. On their own there is no denying that these concoctions are sweet, but splash some into your coffee and you've got a perfectly balanced beverage. And if you have a sweet tooth like me, try them over ice cream! *Erin Loader*
