

WHEAT BEERS

Wheat beers are growing in popularity as craft brewers seek out more styles to attract the consumer. Once mostly found in Germany and Belgium, they are now brewed everywhere. True hefeweizens use more than 50 percent wheat in the grain bill, but wheat ales and wits can use varying amounts. Cloudy beers rule here, but clear versions also exist. Hefes provide banana and clove notes, but other wheat ales may be fruited or have spices added to them. However they are made, they make great patio beers. *David Nuttall*

Good Mood Hefeweizen

Bitter Sisters Tarty Cousin Sue Cran/Raspberry Wheat
Alberta, Canada
\$17-18 (4-pack cans)
CSPC 843731

KOLSCH

Originally brewed in Cologne, Germany, as an answer to the crisp and clear pilsners coming out of the Czech Republic, you can expect the same from a well made Kolsch. They are a hybrid style though, so while brewed at colder temperatures, they are made with ale yeasts and have some subtle and delicate fruit notes derived from those. Don't be scared by the wine talk though, these are beers meant to be drunk ice cold and in numbers. *Bill Bonar*
