

# FRUIT BEER

If the number of submissions this year is any indication, the popularity of fruit beer is definitely on the rise. The key to a good fruit beer is to find balance between the fruit and the beer. This year we tasted a wide range of fruit flavours from the traditional cherry and citrus to bold tropical fruits (pineapple and mango). Next time you are at a pub, order a fruit beer. It is a great match with fish and chips or a burger and fries! *Laurie MacKay*
