

ITALIAN REDS

Italy grows thousands of different grape varieties, some known and others almost forgotten indigenous varietals. We tasted blends from the Alps to the islands - from Sicily, Veneto, Tuscany, and Umbria. The lineup of single varietals was terrific, with aglianico, nebbiolo and barbara as well as less well-known wines made from nero di Troia or perricone. These wines can range from easy-drinking quaffers, ideal with pizza, to complex wines to complement your osso buco. Take a risk, try something new and broaden your wine horizons with any of these engaging wines. *Mary Bailey*
