

CABERNET SAUVIGNON

Cabernet sauvignon doesn't generally require much of an explanation! Easy to love, with its power, structure and dark fruit notes, cab is a grape that likes warmth and abundant sunshine... just like most of us! Yet, it will also thrive in slightly cooler climates, where the herbal and savoury notes will come out more predominantly. Regardless of the style or provenance, cab's complex and distinctive taste profile is a sure bet with Alberta beef, rack of lamb, old cheddar, and stews. *Nathalie Gosselin*
