

BOURBON

When you think of American-made whiskey, the first thing that probably comes to mind is bourbon. While Kentucky-made bourbon is likely the most famous, bourbon can be made anywhere in the United States as long as it's mash bill — or ingredient recipe — includes 51 percent corn, but there are also other rules related to alcohol strength and aging. Bourbons from across the U.S. are filling store shelves, which is a good thing. They are a pleasure to taste. *Darren Oleksyn*
