

PORTERS AND STOUTS

Hailing originally from the UK, these dark beers have branched out into several sub-categories. The common bond is the use of chocolate and/or roasted malt to give the beers their jet-black appearance. The flavours are usually any combination of chocolate, coffee or black licorice. They may range in ABV from 4% to 12%, becoming more full bodied as the alcohol content rises. Spectrum Chocolate Coffee Stout was our favourite and delivers what you expect from the name. *David Nuttall*
